

Catalog of Modules

Plug-in modules that rapidly enhance the value of your site.

Turn your hospital website into a high-performing, interactive channel with CareWorks™ CMS Modules. More than 20 CareWorks plug-in modules are available to enhance end-user experience.

Standard Modules

-  **Audit Trails** Tracks and logs user activity in the CMS, ensuring that rigorous PCI and HIPAA compliance standards are met.
-  **Events Calendar** Robust calendar and event management system gives administrators the ability to post and edit events in a calendar view or list format.
-  **News Manager** Provides flexible and easy-to-use system for adding and posting news releases, press releases, articles, announcements, and other date-sensitive content.
-  **Reports** Simplifies site management with feedback on broken links, expired pages, pending approval requests and other publishing functions.

Add-On Modules

-  **Appointment Request** Physicians and departments can accept requests for appointments 24x7.
-  **Bill Pay** Patients can securely submit payment and view detailed account information.
-  **Blogs** Authors can self-publish content, users can provide feedback, administrators can moderate comments.
-  **Careers** Organizations have the ability to maintain job opportunities, as well as screen and accept potential applicants.
-  **Class Registration** Extends functionality of the Events Calendar allowing registrations. Keeps track of open seats while alerting participants to changes to event details. Ability to accept credit card payments for fee-based events.
-  **Directory Builder** Provides the ability to dynamically create, manage and publish collections of information. Can be used for clinical trials, employee/staff directories, cafeteria menus, and other data driven content.
-  **Donations** Enables hospital foundations to accept secure online contributions.
-  **eGreetings** Friends and family can send greeting cards to patients through the organization's website.
-  **Find a Physician** A searchable directory that displays physician groups, specialty, location, biography, video, photos, logos, awards, and custom fields. Exports to a printer-friendly PDF and integrates with hospital credentialing system.
-  **Form Builder** Administrators can build forms, surveys and polls using a user-friendly interface.
-  **Media Gallery** Administrators can upload, organize and publish photos, animations, banners, and audio files.
-  **MyHealth Patient Portal** A personal page that tracks interactions with the hospital and updates information such as appointments, registrations, bill payments, prescription refills, etc.
-  **Newsletter** Create subscription-based newsletters for patients, family, staff, donors, physicians, etc.
-  **Online Nursery** Securely upload newborn photos that can be shared with family and friends.
-  **Policies** Document repository to store, organize and distribute hospital policy documents.
-  **Pre-Registration** Patients can conveniently pre-register for scheduled appointments online, reducing their wait time.
-  **Rx Refill** Patients can request mail order or pick up prescription drugs online.
-  **Video Library** Showcase audio and video files in a YouTube™-like format.
