

CareTech CMS Blog Module

Create blog content and moderate posts

Front End – Example of "Our Neighborhood" Blogs

Back End – Blogs Category Administrator Pane

Overview

The Blog module from CareTech CMS allows authors to self-publish content, administrators to moderate comments, and users to provide feedback.

Content

The CareTech CMS Blog module allows publishing by one or more editors, along with guest comments.

Administration

The Blog module allows administrators the ability to add multiple authors to categories, manage permissions and approve or deny blog posts.

Customization

The CareTech CMS Blog module can be customized to meet your hospital's needs. Customizations can include design and additional functionality that align with your organization's goals.

Check out the **Blog Module** in use on our client hospital website:
