

# CareTech CMS E-Greetings Module

Allows friends and family to send greeting cards to patients through your website

Front End – Example of an E-Greetings Selection Page

Back End – E-Greetings Administrator Pane

## Overview

The E-Greetings module of the CareTech CMS software allows friends and family to send an electronic greeting to a patient. It also allows the administrators of the module to create and manage Greeting cards on your website.

## Content

By using the E-Greetings module of the CareTech CMS software, you can process, print and deliver greeting cards submitted by family and friends to patients in your facility.

## Administration

The CareTech CMS administrator pane allows website administrators to create and manage E-Greetings card templates and categories.

## Customization

The CareTech CMS E-Greetings module can be customized to reflect changes to layout.
