

CareTech CMS Events Calendar Module

Post and edit events in calendar view or list format

Front End - Example of an Events Calendar

Back End – Events Calendar Administrator Pane

Overview

The Events Calendar module from CareTech CMS allows you to post and edit events in calendar view (day, week, month or timeline), or list format.

Content

By using the Events Calendar module of the CareTech CMS software, you have the ability to display events that visitors can enroll in, such as: Health and wellness classes, Support groups, Screenings, and many more.

Administration

The CareTech CMS administrator pane allows website administrators to perform a filtered search for events, make edits using list or search views, and manage event locations and categories.

Customization

The CareTech CMS Events Calendar module can be customized to meet your hospital's needs. Examples of customizations include changes to layout and adding a thumbnail view.

Check out the **Events Module** in use on our hospital client website:
