Overview

Using the Form/Survey/Poll Builder module of the CareTech CMS software, you can create and manage forms, surveys and polls, view results and generate charts.

Content

By using the Form Builder module of the CareTech CMS software, you can build custom email submission forms, such as Contact Us, or requests for more information using surveys and polls. Data is submitted via email to the address specified on the form.

Administration

The CareTech CMS administrator pane enables administrators to quickly create and edit forms, surveys and polls, as well as view the results. The forms can also be integrated into your site via taxonomy or iframed into other web promotions to provide greater visibility and calls to action.

Customization

The CareTech CMS Form Builder module can be customized to include a variety of changes to form layout and design.
