

CareTech CMS Media Gallery Module

Upload, organize and publish photos, animations, banners, and audio files into galleries on your website

Example of Slideshow on Home Page

Back End – Media Gallery Administrator Pane

Overview

The Media Gallery module from CareTech CMS allows administrators to upload and organize photos, flash animations, banners and audio files into galleries.

Content

By using the Media Gallery module of the CareTech CMS software, you can upload and organize photos, banners and audio files into galleries.

Administration

The CareTech CMS administrator pane allows website administrators to publish galleries from within the CMS WYSIWYG editor onto a content page in multiple display options, such as a slideshow with an easy-to-control image rotator, narrated photo gallery, or animated banner.

Customization

The CareTech CMS Media Gallery module can be customized to align with your functional goals.
