

# BoardNet™

Secure, online “Virtual Boardroom”  
Meet beyond the confines of the meeting room

CareTech's BoardNet makes unproductive meetings a thing of the past. BoardNet provides your committee members the most secure and up-to-date information, no matter where they are. All they need is an Internet connection and a laptop, tablet or smartphone.

BoardNet eliminates the costs and inefficiencies associated with printing and disseminating board books, replacing it with an easy-to-use system that delivers role-based access with a high degree of functionality.

### BoardNet Features:

- Meeting Management
- Building Board Books
- Document Library
- Member Directory
- Forum
- Surveys
- Calendar and Events
- Announcements
- Keyword Search
- News
- Usage History
- Administrative Tools
- My Profile / My Files

### BoardNet also includes:

- Unlimited users and committees per hospital
- 24x7x365 user support
- Hosting services available

CareTech's BoardNet addresses the unique challenges of hospitals and their boards. Whether across the country or in the same room, you can be sure that your members have access to all the information they need to make critical decisions. All content is encrypted and stored in a Tier 3, AHA-endorsed data center that meets all compliance requirements and is supported by a 24x7x365 help desk.

“Prior to having BoardNet, the approximate time it took me to prepare board packets (copies, sorting, stuffing envelopes, mailing, etc. typically took me approximately 3 hours. Most months I'd enlist the help of others to get this lengthy project completed. Now, I am literally done within less than 10 minutes. I have zero complaints from anyone who has access to any of the reports. They have all admired how user-friendly the product is.”
