Overview
The E-Greetings module of the CareTech CMS software allows friends and family to send an electronic greeting to a patient. It also allows the administrators of the module to create and manage Greeting cards on your website.

Content
By using the E-Greetings module of the CareTech CMS software, you can process, print and deliver greeting cards submitted by family and friends to patients in your facility.

Administration
The CareTech CMS administrator pane allows website administrators to create and manage E-Greetings card templates and categories.

Customization
The CareTech CMS E-Greetings module can be customized to reflect changes to layout.
