

CareTechCMS Bill Pay Module

Streamline bill payments for patients and payment processing for your billing department

A screenshot of the "ONLINE BILL PAY" patient information form. The form is titled "ONLINE BILL PAY" and has a section for "Patient Information". It contains several fields with red asterisks indicating required information: "Care Received At" (a dropdown menu), "Account Number", "Amount", "First Name", "Last Name", "Address Line 1", "Address Line 2", "City", "State", "Zip", "Country", "Phone", and "Email".

Front End – Patient Billing Information Screen

A screenshot of the CareTech CMS administrator interface. The top navigation bar includes "BILL PAY", "CONTROL PANEL", "VIEW WEBSITE", "CHANGE PASSWORD", "MANUALS", and "SUPPORT". The main content area is titled "Bill Pay" and features a search section with fields for "Account Number", "First Name", "Last Name", "Date Range" (with "To" and "From" dropdowns), and "Is Processed" (with a dropdown menu). There are "Clear" and "Search" buttons at the bottom of the search section.

Back End – Bill Pay Administrator Pane

Overview

The Bill Pay module provides the capability for patients to pay their bills online.

Content

By using the Bill Pay module of the CareTech CMS software, patients can securely submit payment, and if desired, view either a summary or detailed breakdown of their account. The hospital billing department is sent notification that a payment has been made.

Administration

The CareTech CMS administrator pane allows website administrators to view, filter and process all the bill payments that have been submitted through the website.

Customization

The CareTech CMS Bill Pay module can be customized to meet your needs. It can be integrated with your hospital's billing system to create a seamless and efficient workflow.

Check out the **Bill Pay Module** in use on our hospital client website:
