

Five Cost Factors to Consider

When determining the cost of storing historical patient data, there are several factors to keep in mind, including:

- | | |
|--------------------------|--|
| Software support | <ul style="list-style-type: none"> • Application annual maintenance and licensing fees • Database maintenance and licensing fees |
| Hardware support | <ul style="list-style-type: none"> • Annual maintenance fees |
| Internal support | <ul style="list-style-type: none"> • Staff support requirements |
| Environment cost | <ul style="list-style-type: none"> • Data center space |
| Disaster recovery | <ul style="list-style-type: none"> • Included or paying extra? |

Then there are the intangibles - the factors that are harder to measure:

- The time it takes to convert or access stored files
- Staff and physician satisfaction with the ease and speed of data access
- The cost and time to train clinicians to learn the new system

Legacy decommissioning is a major challenge in today's healthcare IT environment. Through iDoc™ Archive, CareTech Solutions offers an affordable, secure, reliable way to store and access historical patient data.

CareTech Solutions is an IT and Web products and services provider for U.S. hospitals and health systems. We create value for clients through customized IT solutions that contribute to improving the patient experience while lowering healthcare costs.

CareTech Solutions is leading the path in innovative information technology and end-user interface services for U.S. hospitals and health systems. The company helps healthcare organizations leverage emerging digital technologies to improve the quality of healthcare delivery and clinical outcomes. **For more information call us at (877) 700-8324 or visit our website at www.caretech.com.**
