

Facing the legacy decommissioning challenge?

## Balanced Scorecard: 5 Keys to Success

Legacy decommissioning is a major challenge in today's healthcare IT environment. One way to help ensure a successful result is to take a balanced scorecard approach to evaluating your options.

### Here are five critical success factors to legacy decommissioning success:

- 1 Risk** - Does the proposed solution minimize the risk of data loss and downtime?
- 2 Functionality** - How much flexibility does the system provide? Can data from multiple systems and formats be stored and accessed from a single repository?
- 3 Ease** - How much training will clinicians need to use the system? Can they access the data they need with a single click?
- 4 Speed** - How quickly can data be stored? How quickly can data be accessed?
- 5 Cost** - How is pricing determined? What costs are eliminated by the new solution? Can old servers be decommissioned? Can data storage space be freed up in your facility?

Through iDoc™ Archive, CareTech Solutions offers an affordable, secure, reliable way to store and access historical patient data.

CareTech Solutions is an IT and Web products and services provider for U.S. hospitals and health systems. We create value for clients through customized IT solutions that contribute to improving the patient experience while lowering healthcare costs.

 CareTech Solutions is leading the path in innovative information technology and end-user interface services for U.S. hospitals and health systems. The company helps healthcare organizations leverage emerging digital technologies to improve the quality of healthcare delivery and clinical outcomes. **For more information call us at (877) 700-8324 or visit our website at [www.caretech.com](http://www.caretech.com).**
